🏠 Phu Nhuan Distrist, HCM City

EDUCATION

TLUS UNIVERSITY OF INFORMATION TECHNOLOGY

2th year student

SKILLS

Programing languages: Java

Frameworks: Spring Boot

Work tools: Visual studio code, Postman

Source control: Git.

Databases: MySQL, SQL Server

SOFTWARE DEVELOPMENT EXPERIENCE

INTERN JAVA DEVELOPER

Back-end Development Intern
- Using Spring boot to develop APIs based on requirements analyzed in the documentation. Using Gitlab for source code management
- Collaborate with the backend team to test APIs through Swagger and make API calls.
- Engage with team members to ensure a mutual understanding of project goals and requirements, and promote open communication to effectively address challenges and exchange ideas
- After working on that file, I learned many things such as how to work in groups, review code daily for team members, report weekly work to mentors, and work in a professional environment.

PROJECT EXPERIENCE

Mobile Store
Building mobile store

- Link github: https://github.com/thphuc2610 /R2S_MobileStore
- Number of members: 01 (personal project), source code management with github
